Build A BIRDFEEDER

RECYCLED
Art
Project

What You'll Need:

Clean and dry Milk or Juice Carton

1 Paper Clip

1 cup of Birdseed

Stapler

Paint Brush

Glue

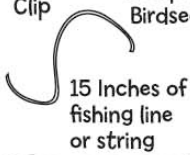

Hole Punch

Pencil

Marker

15 Inches of fishing line or string

Waterproof Paints (Acrylic)

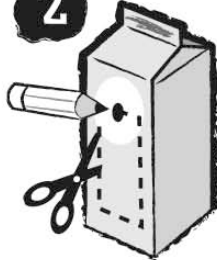

Scissors

1

Draw a large rectangle on the front of your carton. (If your carton is open at the top use a stapler to staple it closed.)

2

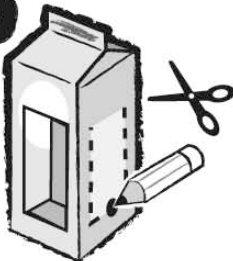

Ask an adult to use a pencil to carefully poke a hole at the top of rectangle. Insert scissor tip into hole. Cut out rectangle and set aside for later.

3

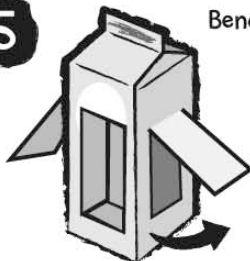

Draw a rectangle shape on the side of carton. Leave the top edge open. Repeat on opposite side.

4

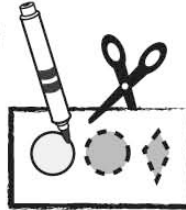

Use the pencil to poke a hole at bottom of rectangle. Cut along the 3 sides of rectangle on both sides.

5

Bend out your wings.

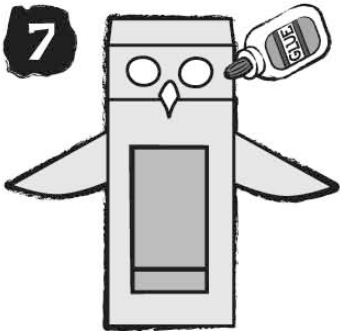

6

EYES and BEAK

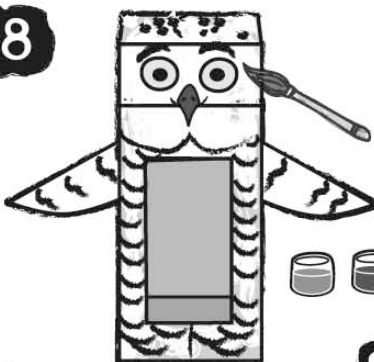

Draw 2 circles for eyes and a diamond for a beak on the leftover rectangle piece. Cut out with scissors.

7

Glue eyes to top of carton. Glue beak so its bottom hangs over the edge.

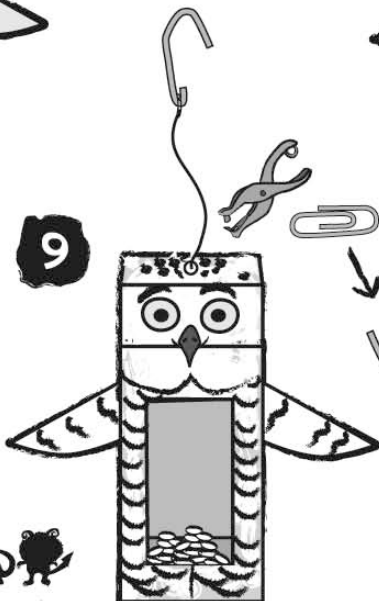

8

Decorate your Feeder!

Use paint and a brush to decorate your feeder. You can choose colors to make it look like a real bird or design it anyway you like.

9

Bend a paper clip to form a hook

Punch a hole in top of feeder. Tie string to the hook and your feeder. Poke 3 holes in bottom of feeder for drainage. Add birdseed and hang from a tree or window.

Watch for Bird Visitors!

Think About It!

- 1 What food do birds eat that are good for kids to eat too?
- 2 Did you know that seeds contain everything needed to grow a new plant? Check out our **Bottle Planter** project for instructions on sprouting you own seeds.
- 3 How many seeds can you name?

Answer = SEEDS
